Plain Language Summary

Enter your Plain Language Summary here or delete this section. Here are instructions on writing a Plain Language Summary: <https://www.agu.org/Share-and-Advocate/Share/Community/Plain-language-summary>

1 = enter section title =**Open Research Section**

This section MUST contain a statement that describes where the data supporting the conclusions can be obtained. Data cannot be listed as "Available from authors" or stored solely in supporting information. Citations to archived data should be included in your reference list. Wiley will publish it as a separate section on the paper's page. Examples and complete information are here: [https://www.agu.org/Publish with AGU/Publish/Author Resources/Data for Authors](https://www.agu.org/Publish-with-AGU/Publish/Author-Resources/Data-for-Authors)

As Applicable – Inclusion in Global Research Statement

The Authorship: Inclusion in Global Research policy aims to promote greater equity and transparency in research collaborations. AGU Publications encourage research collaborations between regions, countries, and communities and expect authors to include their local collaborators as co-authors when they meet the AGU Publications authorship criteria (described here: <https://www.agu.org/publications/authors/policies#authorship>). Those who do not meet the criteria should be included in the Acknowledgement section. We encourage researchers to consider recommendations from The TRUST CODE - A Global Code of Conduct for Equitable Research Partnerships (<https://www.globalcodeofconduct.org/>) when conducting and reporting their research, as applicable, and encourage authors to include a disclosure statement pertaining to the ethical and scientific considerations of their research collaborations in an "Inclusion in Global Research Statement" as a standalone section in the manuscript following the Conclusions section. This can include disclosure of permits, authorizations, permissions and/or any formal agreements with local communities or other authorities, additional acknowledgements of local help received, and/or description of end-users of the research. You can learn more about the policy in this editorial. Example statements can be found in the following published papers: Holt et al. (<https://agupubs.onlinelibrary.wiley.com/doi/full/10.1029/2022JG007188>), Sánchez-Gutiérrez et al. (<https://agupubs.onlinelibrary.wiley.com/doi/abs/10.1029/2023JG007554>), Tully et al. (<https://agupubs.onlinelibrary.wiley.com/doi/epdf/10.1029/2022JG007128>) Please note that these statements are titled as "Global Research Collaboration Statements" from a previous pilot requirement in JGR Biogeosciences. The pilot has ended and statements should now be titled "Inclusion in Global Research Statement".

Conflict of Interest declaration

Please include a comprehensive conflict of interest statement that reflect all conflicts of interest for all involved authors. If there are no conflicts of interest please state, "The authors declare there are no conflicts of interest for this manuscript."
