

MMIA Abstract Title

Presenting Author^{1,*}, Second Author¹, and Third Author²

¹Department name, Institution, City, Country

²Department name, Another institution, Another city, Country

*presenting.author@medical-img-lab.pt

Write your abstract here. Do not exceed a length of one A4 page, including figures, tables, references, and acknowledgements. Do not modify the submission template. Start by providing an introduction, motivation, and contributions, then describe your methodology, results, and conclusion. Equations can be added and referenced (see Eq. 1):

$$DSC = \frac{2|X \cap Y|}{|X| + |Y|} \quad (1)$$

Figures (Fig. 1) and Tables (Table 1) can also be added. For references, use the Bibtex format in a .bib file and use biber as a compiler [1, 2].

Once you are ready, go to [the conference website](#) to upload your abstract. The main file for submission is the .pdf version of your abstract. Additionally, you must submit a .zip file containing your .tex file, together with any .bib file and figure(s) (if any). This is required so that your abstract can be included in the book of abstracts.

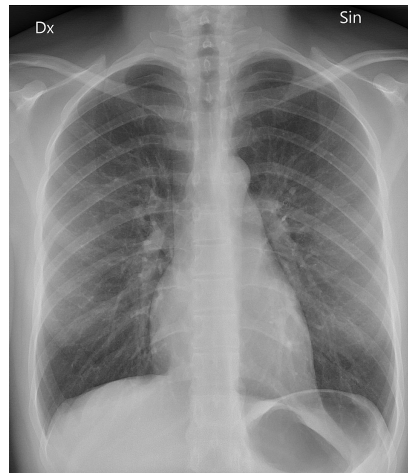

Figure 1: Example of a normal posteroanterior (PA) chest radiograph.

Table 1: Example of a table of results.

	A	B	C
True Positives	6	87837	787
False Positives	7	78	5415
False Negatives	545	778	7507
