

Title 6-8 Words (Subsequent Single Line Running Header) [Book Antiqua 24 Bold Italic Centred - separator line 2 1/4 thick]

Author Times New Roman^a, 12 Bold^b, Italic Centred and Space Before 6^c

Received 3 March 2017, in revised form 7 July 2017 and accepted 13 July 2017

1 *Abstract: Abstract: Times New Roman 11 bold italic jus-*
2 *tified space before 12. Abstract times new Roman 11 bold*
3 *italic justified space before 12. Abstract times new Roman 11*
4 *bold italic justified space before 12. Abstract times new Ro-*
5 *man 11 bold italic justified space before 12. Abstract times*
6 *new Roman 11 bold italic justified space before 12. Abstract*
7 *times new Roman 11 bold italic justified space before 12. Ab-*
8 *stract times new Roman 11 bold italic justified space before*
9 *12. Abstract times new Roman 11 bold italic justified space*
10 *before 12. Abstract times new Roman 11 bold italic justified*
11 *space before 12. Abstract times new Roman 11 bold italic*
12 *justified space before 12. Abstract times new Roman 11 bold*
13 *italic justified space before 12. Abstract times new Roman*
14 *11 bold italic justified space before 12.*

15 **Additional keywords:** Times new Roman, 10, space be-
16 fore 12, not, in, title, or, abstract, no full stop at the end; Up to
17 5 keywords allowed.

1

Many formatting features of this journal have developed over decades of mostly the printed version and present policy is to honour this tradition by minimizing deviations from this formatting. The word processing program of choice remains Microsoft Windows. The editorial/copy editing process is in-

36 tegrated, so that as the final MS-Word version emerges, it
 37 merely needs to be converted to .pdf file format for publishing
 38 on the internet.

39 There is no indent after a heading. All sections are num-
 40 bered. Journal main text is in Times New Roman 10 font. Fig-
 41 ures, equation and tables are referred to using non-capitalised
 42 references and the numbers not in brackets. Each figure and
 43 table must be at least so referred to before (or above) the figure
 44 (e.g. see figure 1). The page format is double column, with a
 45 1.67 cm all round margins, the columns are 8.5 cm wide and
 46 separated by 0.5 cm blank space. Unfortunately this has im-
 47 plication for figures and tables, which must fit into a single
 48 column. A figure or table which spans both columns must be
 49 the exception.

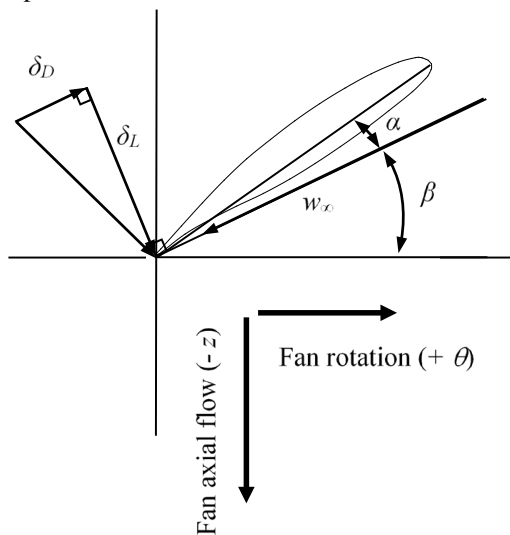

Figure 1 Figure should fit into one column, titles should be brief, and may not exceed three indented lines in Arial 10, Space after 6, space before 6.

50 Figures and photographs in colour are of course welcome.
 51 Tables, such as table 1, should have captions above the table.
 52 In general tables, figures and equation should be placed after
 53 the first reference to it in the text. All figures and tables must
 54 be referred to in the text. Leave an open line after a table.

55 In general equations should be numbered. The numbers
 56 must be aligned to the right margin of the column, such as
 57 equation 1. The equation is aligned to the left margin and not
 58 indented.

Table 1 Table should fit into one column. Titles should be brief and may not exceed three indented lines in Arial 10, Space before 6, space before 6.

Column 1	Column 2	Column 3
text	text	text
text	text	text

$$(x + a)^n = \sum_{k=0}^n x^k a^{n-k} \quad (1)$$

59
 60 Subsequent paragraphs are indented (hanging) in the first
 61 line by 0.5 cm, even if they start after a figure. Referencing
 62 is carried out by means of a superscript number, author names
 63 may of course be stated as well, numbering and listing occur-
 64 ring in the order of citation.

2 The Second Main Heading Arial 12 Bold

2.1 The first secondary heading Arial 11 bold, space before 12

2.1.1 The third level heading Arial 10 not bold, space before 12

71 There may thus be up to three levels of embedded sections.

72 Referencing occurs via the number format in square brackets
 73 and the list of references following the main body of the
 74 paper. A sample of the format of the references, more exten-
 75 sive than that provided in the instructions to authors is in-
 76 cluded below. Do not use *et al.* in the list of references but
 77 always state all the authors. Always state page numbers or
 78 number of pages for papers. The list of references appearing
 79 at the end of the paper is balanced over the two columns. The
 80 authors name appear in italics, as do the Titles of the Journals.
 81 Paper titles are not capitalised, book, theses and report titles
 82 are capitalized.

3 Lists

84 Here is an example bullet list:

85 • Item 1

86 • Item 2

87 Here is an example numbered list:

88 1. Item 1

89 2. Item 2

90 4 References

91 The list of references must be given at the end of the paper.

92 References must be listed in the order that they appear in the
93 main text. All references should be numbered. When citing

94 a reference, put the reference number in square brackets, e.g.

95 [1] or [1,4] if citing more than one reference..

96 Here are a couple of examples for references: Book [1, 2,
97 3], PhD thesis [4], Masters thesis [5], journal [6], website [7],
98 conference [8], British standard [9], in collection [10].

99 Here is the Bibtex code for a British standard.

```
100 @TechReport{BS848,
101   title      = {Fans for General Purpo-
102               ses. {P}erformance Test-
103               ing Using Standardized
104               Airways },
105   institution = {British Standards
106               Institution },
107   year       = {1997},
108   type       = {Standard },
109   month      = {September },
110   key        = {BS 848-1},
111   timestamp  = {2017-12-11},
112 }
```

113 When using Bibtex, make sure there are spaces between the
114 initials (in the case of more than one first name) to ensure all of
115 them are displayed. Make sure there is a “and” between each
116 author name to have the correct punctuation in the reference
117 list, otherwise there will not be a comma between the names of
118 multiple authors. Full first names of authors are not allowed.

Give all the initials.
